

DentalMonitoring, SmileMate and Vision are products designed and manufactured by Dental Monitoring SAS, under the DentalMind branding for Health Care Professionals (HCPs). They are also used by patients under the mandatory supervision of Health Care Professionals (HCPs). DentalMonitoring and SmileMate are designed to assist HCPs with remotely observing intraoral situations (and monitoring orthodontic treatments for DentalMonitoring). Refer to your HCP and/or the Instructions for Use before use. DentalMonitoring product is a medical device (in Europe only), registered as such and holding the CE mark. Vision simulations are generated using artificial intelligence, they are not contractual and may differ from the final results of the patient's treatment. Product availability, claims and regulatory status may differ across countries depending on local regulations. Contact your local representative for further information. AD_MON_BR_070_01_rd_P_MF_en

Ready, set, smile!

Discover the only app that can really make you smile!
With DentalMonitoring, scan your smile from your smartphone, so that your doctor keeps track of your treatment remotely.

DentalMonitoring is made for you:

More convenience

Enjoy the simplicity of regular remote checkpoints to make sure your treatment is tracking well!

Better communication

Receive your own treatment recommendations and contact your practice easily with an in-app messaging system for any concerns or any questions.

Higher motivation

See your smile change before your eyes using the unique before/after feature. There's no better feeling than seeing your dream smile take shape on your screen.

More fun

Play to win!! The DM app has a friendly design, including gaming features to make the patient experience fun and rewarding.
