

Tired of travelling back and forth to our practice?

Now, we can track your treatment progress every week with DentalMonitoring. Send us scans of your smile from wherever you are and only come in when needed.

Talk to your doctor for more information.

DentalMonitoring
Smarter Orthodontics

DentalMonitoring, SmileMate and Vision are products designed and manufactured by Dental Monitoring SAS, under the DentalMind branding for Health Care Professionals (HCPs). They are also used by patients under the mandatory supervision of Health Care Professionals (HCPs). DentalMonitoring and SmileMate are designed to assist HCPs with remotely observing intraoral situations (and monitoring orthodontic treatments for DentalMonitoring). Refer to your HCP and/or the Instructions for Use before use. DentalMonitoring product is a medical device (in Europe only), registered as such and holding the CE mark. Vision simulations are generated using artificial intelligence, they are not contractual and may differ from the final results of the patient's treatment. Product availability, claims and regulatory status may differ across countries depending on local regulations. Contact your local representative for further information.
